

REMARKS/ARGUMENTS

This Amendment is in response to the Notice of Non-Compliant Amendment mailed October 24, 2006. This Amendment assumes that the prior amendment (mailed August 18, 2006) in response to the Office Action mailed May 19, 2006 was not entered, such that claims 1-79 remain pending in the present application, with claims 1-41 and 66-79 being withdrawn. This Amendment amends claims 42, 50, 54, 56, 59, 62, and 63, and cancels claims 43 and 51, leaving pending in the application claims 1-42, 44-50, and 52-79, with claims 1-41 and 66-79 remaining withdrawn. Reconsideration of the rejected claims is respectfully requested.

I. Non-Compliant Amendment

The previous amendment was rejected as failing to underline one word that was added in the claims section, in order to indicate such addition. Applicants appreciate the Examiner's attention to detail, and have amended claim 42 to ensure that any changes are accurately reflected. The other claims have been checked to ensure the same. Applicants therefore respectfully request acceptance and consideration of the present amendment.

II. Objection to the Claims

Claims 50 and 59 are objected to as containing informalities, particularly the lack of the word "of" in claim 50 and a typographical error for the word "from" in claim 59. Applicants appreciate the Examiner's helpful suggestions and have amended the claims accordingly. Applicants therefore respectfully request that the objections be withdrawn.

III. Rejection under 35 U.S.C. §112

Claims 50, 56 and 62 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, claims 50 and 56 are rejected as including negative limitations. Claims 50 and 56 as amended should not contain language that can be construed as negative limitations. Claims 56 and 62 are rejected as lacking proper antecedent

basis for the term "predetermined computer systems." Claims 56 and 62 as amended no longer include such recitation. Applicants therefore respectfully request that the rejections with respect to these claims be withdrawn.

IV. Rejection under 35 U.S.C. §103

Claims 42, 43, 50-51, 54-56, and 62-65 are rejected under 35 U.S.C. § 103(a) as being obvious over *Kraft* (U.S. Patent No. 6,418,453) in view of *Dutta* (U.S. Patent No. 6,636,854). Applicants respectfully submit that these references do not teach or suggest each element of these claims.

For example, Applicants' claim 42 as amended recites a method for accessing data comprising:

- storing a plurality of files in a file server;
- providing a first export to each of a plurality of client computers and a second export to a search engine;
- receiving a directory list request for a selected one of the first and second exports;**
- in response to receiving the directory list request, producing a first directory listing that is representative of all contents of a first directory for the selected export when the selected export is a first export to one of the client computers;**
- in response to receiving the directory list request, producing a second directory listing that is representative of updated contents of a second directory for the selected export when the selected export is the second export to the search engine, files represented in the second directory listing being based on one or more criteria contained in a file filter table, wherein an index for the search engine is updated based on the second directory listing**

(*emphasis added*). Such limitations are neither taught nor disclosed by *Kraft* and *Dutta*.

Kraft teaches a repository service for web crawling, which automatically maintains a file modification list and provides this list to a requesting crawler (col. 2, lines 14-28). *Kraft* does not teach or suggest a determination process wherein different directory listings are generated in response to a request based on the selected export of the request, wherein one directory listing contains all contents of a directory and the other directory listing containing only updated contents of a directory. As *Kraft* does not teach or suggest such a determination process, then generating a list whose contents depend upon the result of that process, *Kraft* cannot render obvious Applicants' claim 42.

Dutta does not make up for the deficiencies in *Kraft* with respect to claim 42. *Dutta* teaches the augmenting of conventional search engine results with peer-to-peer search results

(col. 1, line 65-col. 2, line 7). *Dutta* does not, however, teach or suggest a determination process wherein different directory listings are generated in response to a request based on the selected export of the request, wherein one directory listing contains all contents of a directory for the export and the other directory listing containing only updated contents of a directory. As *Dutta* does not teach or suggest such a process, *Dutta* cannot render obvious Applicants' claim 42, or the claims that depend therefrom, either alone or in combination with *Kraft*.

Applicants' claim 54 recites a limitation wherein such different directory listings are generated based on an identification (e.g., IP address) associated with the request. *Kraft* and *Dutta* also fail to teach or suggest such a limitation, such that these references cannot render obvious Applicants' claim 54 or the claims that depend therefrom. The other pending claims recite limitations that similarly are not rendered obvious by *Kraft* and *Dutta* for reasons including those cited above. As such, Applicants respectfully request that the rejection with respect to claims 42, 43, 50-51, 54-56, and 62-65 be withdrawn.

Claims 44-49, 52, 53, and 57-61 are rejected under 35 U.S.C. § 103(a) as being obvious over *Kraft* in view of *Dutta*, and further in view of *Hill* (U.S. Patent No. 7,020,658). As discussed above, these claims are not rendered obvious by *Kraft* and *Dutta*. *Hill* does not make up for the deficiencies in these references with respect to these claims. *Hill* teaches a system for managing files for browsers (col. 3, lines 15-24), but does not teach or suggest a determination process wherein different directory listings are generated in response to a request based on the selected export of the request, or the source or an identifier associated with the request, wherein one directory listing contains all contents of a directory for the export and the other directory listing containing only updated contents of a directory. As such, *Hill* cannot render claims 44-49, 52, 53, and 57-61 obvious, either alone or in any combination with *Kraft* and *Dutta*. Applicants therefore respectfully request that the rejection with respect to claims 44-49, 52, 53, and 57-61 be withdrawn.

V. Amendment to the Claims

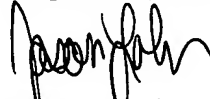

Unless otherwise specified, amendments to the claims are made for purposes of clarity, and are not intended to alter the scope of the claims or limit any equivalents thereof. The amendments are supported by the specification and do not add new matter.

CONCLUSION

In view of the foregoing, Applicants believe all claims now pending in this Application are in condition for allowance. The issuance of a formal Notice of Allowance at an early date is respectfully requested.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 925-472-5000.

Respectfully submitted,

Jason D. Lohr
